Abstract **1**

1 Introduction **2**

1.1 Background 2

1.2 Motivation 2

1.3 Objectives 2

1.4 Scope 2

2 Related Work **3**

2.1 Research Gap 3

3 Problem statement **4**

4 Justification for the problem formulation **5**

4.1 Need for the Proposed Work 5

4.2 Feasibility 5

4.3 Expected Contribution 5

5 Methodology **6**

5.1 Architectural Design for Proposed System 6

5.2 Modules 6

5.2.1 Module 1: Data/Input Management 6

5.2.2 Module 2: Core Processing 6

5.2.3 Module 3: User Interface and Output 6

5.2.4 Module 4: Testing and Evaluation 6

6 Project timeline chart **7**

List of Figures

5.1 High-level architecture of the proposed system 6

6.1 Project timeline 7

List of Tables

2.1 Summary of related work 3

Abstract

Write a concise summary in approximately 200–300 words. Include the background, problem, proposed approach, results, and main contribution.

Keywords: Keyword 1; Keyword 2; Keyword 3; Keyword 4

1. Introduction

Introduce the project domain, motivation, context, and significance.

1.1 Background

Describe the required technical background.

1.2 Motivation

Explain why this work is important.

1.3 Objectives

1. To design and develop ...
2. To implement and evaluate ...
3. To compare the proposed solution with ...

1.4 Scope

State the project boundaries.

2. Related Work

Critically compare relevant work and cite sources, for example [1].

Table 2.1: Summary of related work

S.No.	Author/Year	Proposed Method	Key Findings	Limitations
1	Author et al. (2025)	Describe the method.	State the result.	State the gap.
2	Author et al. (2024)	Describe the method.	State the result.	State the gap.

Summary of Related Works table is mandatory and it should list the mainly refered documents for your work. Don't change the table column headings.

2.1 Research Gap

Identify the gap addressed by this project.

3. Problem statement

Present a precise, measurable problem with inputs, outputs, constraints, and criteria.

4. Justification for the problem formulation

Justify the technical need, relevance, feasibility, and expected impact.

4.1 Need for the Proposed Work

Explain why the problem deserves attention.

4.2 Feasibility

Discuss technical, operational, economic, and schedule feasibility.

4.3 Expected Contribution

State the anticipated novelty or improvement.

5. Methodology

Describe the complete workflow used to achieve the objectives.

5.1 Architectural Design for Proposed System

Explain components, responsibilities, interfaces, data flow, and deployment.

Figure 5.1: High-level architecture of the proposed system

5.2 Modules

For each module, specify its purpose, inputs, processing, outputs, and dependencies.

5.2.1 Module 1: Data/Input Management

Describe input handling and preprocessing.

5.2.2 Module 2: Core Processing

Describe the main algorithm or business logic.

5.2.3 Module 3: User Interface and Output

Describe interaction and reporting.

5.2.4 Module 4: Testing and Evaluation

Describe testing and validation.

6. Project timeline chart

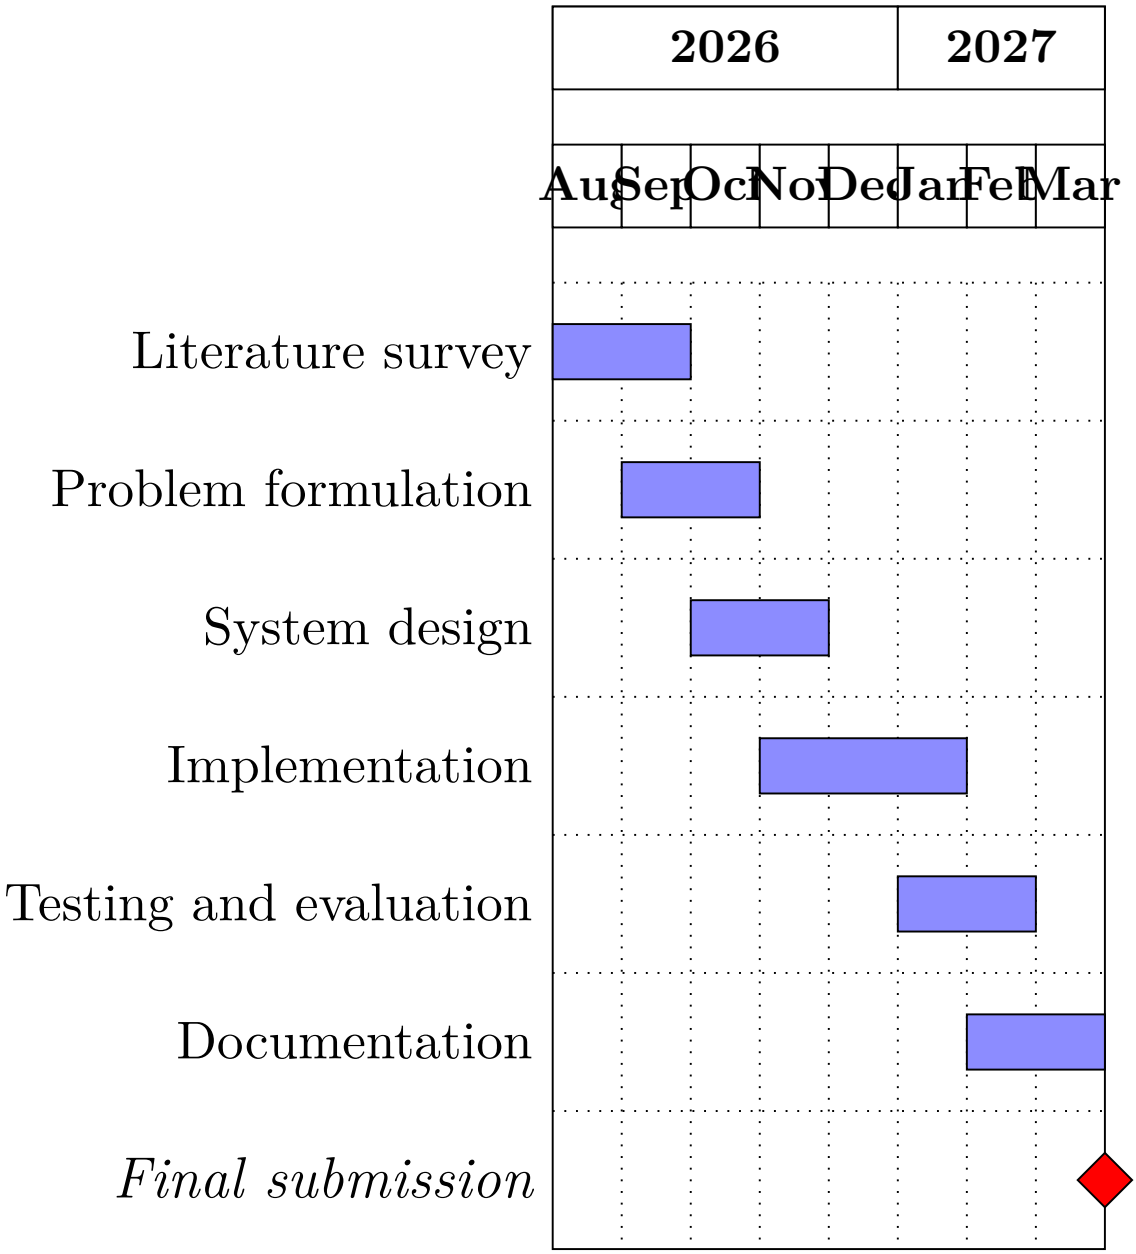

Figure 6.1: Project timeline
