REVIEW REPORT – II

Submitted by

Student Name 1 (Register No.)
Student Name 2 (Register No.)
Student Name 3 (Register No.)
Student Name 4 (Register No.)

Under the guidance of

Dr./Mr./Ms. Supervisor Name

Academic Year: 2026–2027

Contents

Abstract **1**

1 Introduction **2**

1.1 Objectives 2

2 First Review - Queries and Answers **3**

3 Problem statement **4**

4 Methodology **5**

4.1 Architectural Design for Proposed System 5

4.2 Modules 5

4.2.1 Module 1: Data/Input Management 5

4.2.2 Module 2: Core Processing 5

4.2.3 Module 3: User Interface and Output 5

4.2.4 Module 4: Testing and Evaluation 5

5 Implementation **6**

5.1 Module 1 6

6 Results and Discussion **7**

List of Figures

4.1 High-level architecture of the proposed system 5

List of Tables

Abstract

Write a concise summary in approximately 200–300 words. Include the background, problem, proposed approach, results, and main contribution.

Keywords: Keyword 1; Keyword 2; Keyword 3; Keyword 4

1. Introduction

Introduce the project domain, motivation, context, and significance.

1.1 Objectives

1. To design and develop ...
2. To implement and evaluate ...
3. To compare the proposed solution with ...

2. First Review - Queries and Answers

- Query 1 - Answer
- Query 2 - Answer

3. Problem statement

Present a precise, measurable problem with inputs, outputs, constraints, and criteria.

4. Methodology

Describe the complete workflow used to achieve the objectives.

4.1 Architectural Design for Proposed System

Explain components, responsibilities, interfaces, data flow, and deployment.

Figure 4.1: High-level architecture of the proposed system

4.2 Modules

For each module, specify its purpose, inputs, processing, outputs, and dependencies.

4.2.1 Module 1: Data/Input Management

Describe input handling and preprocessing.

4.2.2 Module 2: Core Processing

Describe the main algorithm or business logic.

4.2.3 Module 3: User Interface and Output

Describe interaction and reporting.

4.2.4 Module 4: Testing and Evaluation

Describe testing and validation.

5. Implementation

5.1 Module 1

Present the implementation details of Module 1

6. Results and Discussion

Present the overall results of your proposed work with existing work and present research based discussion.
